Software Developer with a background in the transportation industry. I have chosen to develop a skill set that gives me the challenges I need to excel.

## **Profile**

Establish positive working relationships with customers, vendors, and staff at all levels.  
Experienced in completing complex projects and multiple tasks with little supervision.  
Strong planning, project management, and organizational skills with the ability to act independently and solve problems before they arise.  
Created best practice to meet metrics that were missed

## **Technologies**

HTML | CSS | Javascript | Material-UI | Bootstrap | Git | Github | React | Node | Mongo  
Express | SQL | PostgreSQL | Python | Django | AWS | VS Code | Material-UI | Jira |  
Slack | Heroku

## **Projects**

[Flash Cards](#) | [Michelin](#) | [Project Weather](#) | [Sprint Project](#)

## **Education | Training**

GA General Assembly: Software engineering immersive

United States Marine Corps: Aviation maintenance, Honor Graduate, NCO Leadership

Corporate Schools

Supervisor Leadership School  
Automotive Fleet Training School,  
Aircraft Ground Equipment training

## **Experience**

### **Hazmat Tanker Transport**

**2020 - 2015**
